

Not tight enough?

Find it out with the new
Airtightness testing device **airLPT321**

Detect leaks in your air duct system to determine the amount of air leakage and the corresponding airtightness class according to EN 16798-3 or EN 1507 and EN 12237 especially in air handling systems.

- » Automatical measuring process according to EN 1507 and EN 12237
- » Positiv and negative pressure testing
- » Delivered in its own stackable robust plastic case
- » Measurement report printed with integrated fast thermal printer or directly transferred to usb drive
- » Environmentally friendly reusable packaging for logistics for calibration and maintenance

- ✓ Fully equipped for use on construction sites
- ✓ Quick and easy connection by magnetic adapters
- ✓ Secure sealing with reusable sealing compound
- ✓ Longer pressure tube for bigger range
- ✓ Only small test holes necessary
- ✓ For rectangular and circular air ducts
- ✓ Operation via App possible
